FOR IMMEDIATE RELEASE

## "Ready-to-Go" Transportation Projects

The following is Nebraska's current list of potential "Ready to Go" projects totaling \$370 million. This list is based on assumed criteria in anticipation of the enactment of a stimulus bill from Congress.

No local projects are listed at this time. However, the Nebraska Department of Roads, through the League of Municipalities and the Nebraska Association of County Officials (NACO), has solicited cities and counties to provide by December 31, 2008 a list of projects they believe could meet the "ready to go" criteria.

All potential stimulus projects are or will be reviewed with the Federal Highway Administration and all other required Federal and State regulatory agencies to determine their deliverability within the assumed stimulus timeframes.
